ACKNOWLEDGEMENT

The journey of thesis writing is never easy. It can be metaphorically compared to running a marathon. During the thesis writing process, the finishing line seemed no where to be seen. It was during those difficult times that I experienced the grace and faithfulness of my Lord Jesus Christ. Therefore, I would like to give thanks to my Almighty God for His faithfulness to me that enabled me to cross the finishing line. I would like to express my heartfelt gratitude to my supervisor, Professor Dr. Zuraidah Mohd Don for her patience, guidance and encouragement during my thesis writing process. Without her wisdom, guidance and support, this thesis may not materialized.

I would like to put a note of special thanks to Andrew Au who has facilitated me with the opportunity to access to the wide array of literature. My heartfelt thanks go to my ever supportive parents and cell group members for their constant encouragement and prayer support. I would like to specially thank Adelene Lim and Amy Leow for their words of encouragement and unwavering prayer support. It is indeed wonderful to see the “birth” of the fruit of my labour. Lastly, I would like to express my thanks and gratitude to friends, colleagues who contributed directly and indirectly to the completion of this thesis. I sincerely hope that future researchers will benefit from the findings of this study.
